Product Description

This XYSFitness rowing machine ergonomically designed handles, adjustable foot-rests, and a flywheel design for smooth movements with minimal noise. The Model D also includes a comfortable 14” seat height with an aluminum rail and stainless steel track for a consistent back-and-forth slide without any sudden starts or stops. When done training, you can quickly break down the rower into two segments for storage or use the included caster wheels for easy transport.

To adjust how much air enters the flywheel housing on each stroke, the XYSFitness rowing machine includes a unique spiral damper that you can adjust from a setting of 1 to 10. This functions much like the gears on a bike, affecting how much energy will be needed to accelerate from one stroke to the next.

The XYSFitness rowing machine is efficiently engineered and will last a lifetime. It also is the same machine used by Olympic-level athletes to train for their sport-it'll take the abuse of heavy training day after day. And the rowing machine is a solid piece of exercise equipment offered at a great value.

Product Specifications

—Flywheel design for smooth feel, minimal noise
—Spiral Damper with adjustable 1-10 settings

—Ergonomic handle promotes natural arm and hand position.
—14” Seat moves smoothly on aluminum rail / stainless steel track

—Easy assembly with tools and illustrated instructions included
—Caster wheels for mobility

Packaging & Delivery

Packaging Details:

1: 1 PC of resistance parachute into a pp bag ;
2: Then many bags into a carton .

Delivery Detail:

Within 27 days after payment

Performance Monitor

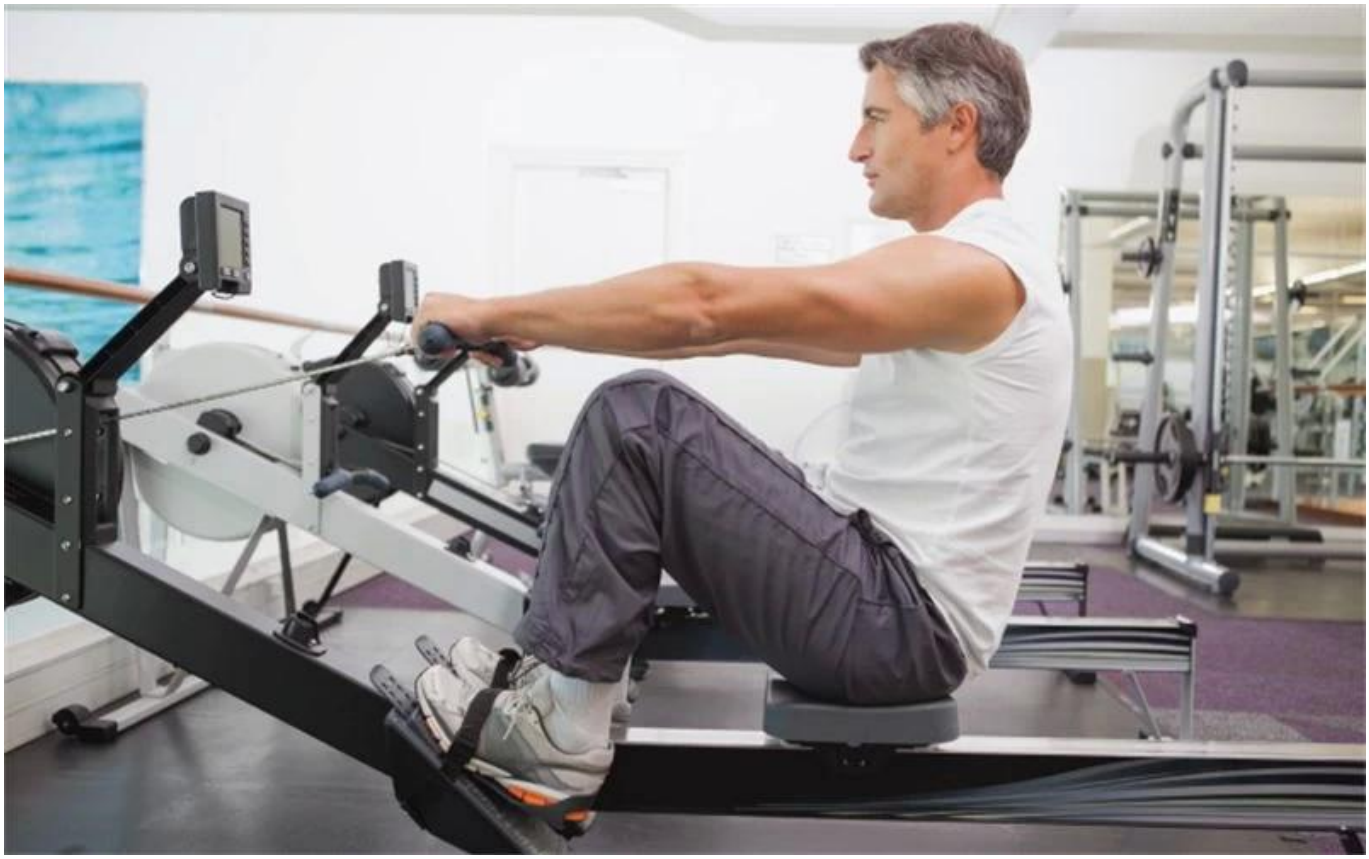
Sophisticated yet easy to use, it provides accurate, comparable data for every row. A backlight increases visibility, compatibility with USB flash drives makes storing your workout data a breeze, and you can wirelessly monitor your heart rate. The adjustable monitor arm on the XYSFitness rowing machine lets you position the monitor where you prefer.

Adjustable Footrests and Ergonomic Handle

We use adjustable footrests on our indoor rowers for quick and easy sizing. (Footrests accommodate a wide range of shoe sizes.) Our comfortable, ergonomic handle features a 10 degree bend that allows you to row with a natural arm and hand position.

Flywheel and Damper

Our indoor rowers respond to your effort on every stroke, so you are in full control of your exertion and resistance at all times. The spiral damper allows you to easily adjust the airflow to the flywheel, so you can change the feel of the stroke to suit your preference. The flywheel design minimizes noise while maximizing a smooth feel.

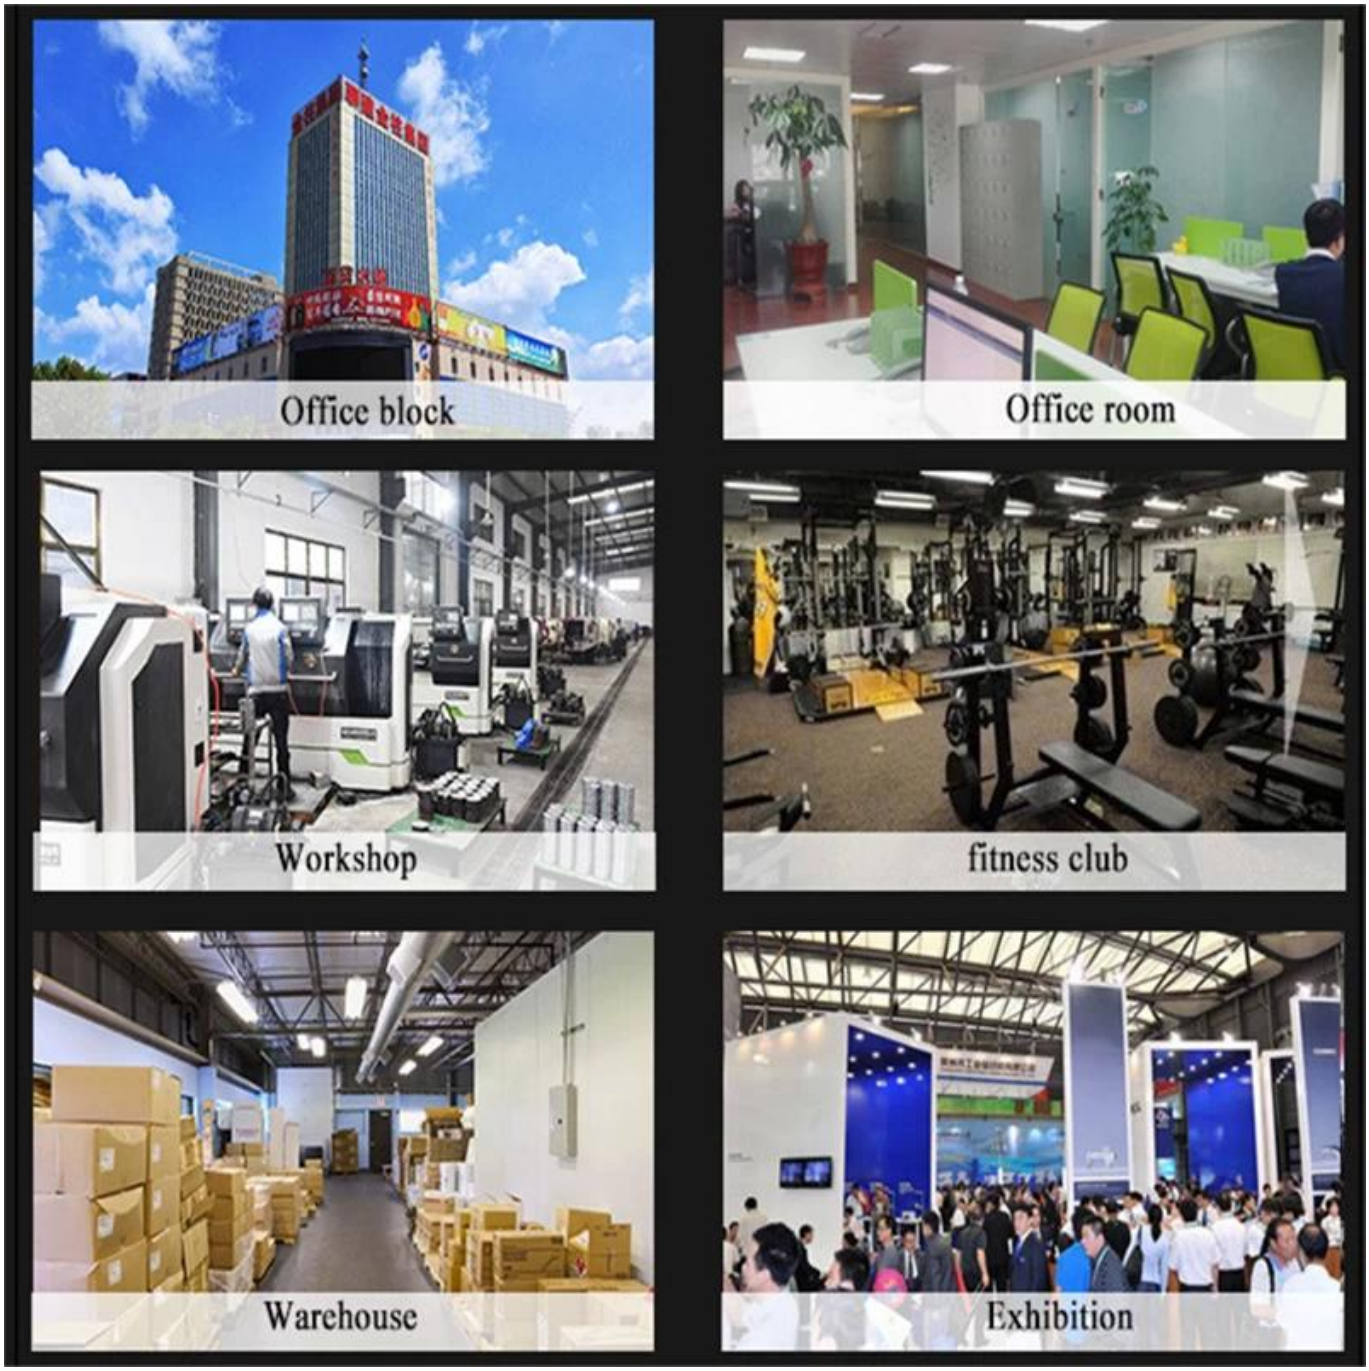


Company Information

SHANDONG XINGYA SPORT FITNESS INC is a professional exercise equipment enterprise for development , production and sales of dumbbell , barbells , kettlebell , mats , racks , CF and other rubber coated and dipping products .

Upon the advanced production equipments and strict quality control system , with nice quality products and high quality , now we have established a solid business relationship with hundreds of customers all over the worlds , including North America , Europe , the Middle East and Asia . " Creating value for all customers with innovation and quality " is our changeless promise .

We sincerely hope to build a nice and long cooperation with you in the future .



Our Service

– Shipment and sample quality tracking includes lifetime .

– Any small problem happening to our product will be solved at the prompt time .

– All your inquiry replied within 24 hours .

– Strictly produce control system and closely cooperate with strong gym equipment factories

– OEM / ODM orders are welcome .

– High quality service with whole modern team , adding many years export experience .
