# **ViPR**®

### EXERCISE GUIDE

- Warm up for 3-5 minutes before each session.
- Complete 1–3 sets of 8–12 repetitions of each exercise selected.
- Rest approximately 30-60 seconds between each exercise set.
- Perform each exercise in a controlled manner, through a full range of motion.
- When applicable, perform an equal number of exercise repetitions with each arm to avoid the development of muscle imbalances.
- If unable to complete 8 exercise repetitions through a full

range of motion, increase rest time between exercise sets or decrease repetitions.

### -OR-

- If unable to achieve moderate to maximal muscular fatigue following the completion of 12 exercise repetitions through a full range of motion, decrease rest time between exercise sets or increase repetitions.
- Perform each exercise a minimum of 3 times per week for maximum results
- Allow 24-48 hours of complete rest between each exercise session.

Start: Bend knees and sit back and down until thighs are parallel to floor. Grasp outer openings of ViPR\* in vertical position with bottom arm straight and top arm bent.

Finish: Straighten legs and drive hips forward while extending the top arm, bending bottom arm, and lifting ViPR® upward. Return to start position and repeat.

Start: Stand with feet hip width apart. Place ViPR® slightly in front of feet. Place both hands on top.

Finish: Step laterally to one side of the body allowing the ViPR® to fall over to the same side. Catch ViPR® with hand on that side. Repeat in opposite direction.

Start: Stand with feet slightly wider than shoulder width apart, bend knees slightly, hinge forward and rotate at the waist. Grasp the outer openings of ViPR® and hold it vertically above the floor just outside the foot with front arm straight and back arm bent.

Finish: Straighten leg and shift weight to opposite side of body while rotating at the waist and lifting ViPR® up and across to opposite side of body. Return to start position and repeat.
