

COMPLETE MODULAR POWER RACK FOR FITNESS

Why settle for off the shelf when you can have a power rack that's custom built just for you! This power rack is the most versatile power cage ever designed. Whether you train CF, powerlifting, bodybuilding or anything in between, the power rack is 100% customizable so you can take your workout to the next level.

Start with the bulletproof PowerRack base unit forged with precision welded, laser cut steel. The Rack base unit offers 54 different numbered adjustment points to perfectly position any size user for bench press, squats and more.

Then choose from 20 different accessories including chin-up bars, J-hooks, safeties, cable attachments and our first ever monolift!

Complete your system with the versatile Bench. Each Bench features flat, incline and decline settings and comes complete with removable preacher curl attachment and separate leg developer. The Rack has been engineered and tested to meet our rigorous safety standards and weight ratings. So you're guaranteed the safest, highest quality power rack available. And we stand behind every Rack with our iron clad lifetime structural warranty.
