

Product Specification:

Dumbbells are a simple, economical piece of fitness equipment.

When it comes to traditional and functional exercise versatility, bio-mechanical correctness and price, few other fitness products compare with dumbbells. There is good reason why dumbbells have been the fitness product of choice for decades and that is not changing anytime soon.

Home and commercial dumbbells offer a compact solution for full body workouts. Just about every muscle group can be worked in a small, compact user space. Combined with a simple flat bench, the exercise choices become even greater in number.

In regards to bio-mechanics, the user dictates the range of motion, unlike weight machines and home gyms. This helps alleviate stress on joints and potential long-term overuse injuries.

In terms of price, when compared to expensive weight machines and gyms, dumbbells are relatively very affordable, especially when comparing the overall exercise benefits. In addition, they are maintenance-free with no moving parts creating a long lasting exercise tool for your home or commercial gym.
