

Product Description

The new XYSFitness [Push Sled](#) is the next evolution of the power sled—compact, tough, and versatile enough for push, [pull and speed training](#) on almost any surface. With the addition of holes in the sled's skis, it's also now compatible with a wide range of mountable attachments, including the Double Handle, Lawn Boy, Wheelbarrow, and more.

This sled comes standard with two pairs of upright push bars designed to accommodate both high and low push stances. Compared to many [power and speed sled](#) designs, the

portable sled has a smaller overall surface area, allowing you to get the most out of the plates that you own.

Improving your body's ability to maximize its use of the anterior and posterior chain is the holy grail of power and performance. This is what [ideal resistance sled training](#) can accomplish, and it's what the XYSFitness push Sled delivers.
